Career Objective

To build a career in cybersecurity where I can apply and further develop my practical knowledge of network security, penetration testing, vulnerability assessment, digital forensics, and threat analysis. I aspire to work on real-world security challenges, identify and investigate vulnerabilities and threats, and contribute to strengthening the security of systems and organizations while continuously expanding my technical expertise

PROFESSIONAL SUMMARY

Cybersecurity and Digital Forensics postgraduate with a strong interest in cybersecurity, network security, penetration testing, and digital forensics. I enjoy learning through hands-on labs and practical projects, where I can apply security concepts to real-world scenarios and understand how systems can be protected against different threats. I have experience working with Python, Linux, Nmap, Wireshark, Burp Suite, Metasploit, FTK Imager, and Autopsy, along with developing security-focused projects involving phishing detection, network reconnaissance, password security, and Android threat detection. Currently pursuing an M.Sc. in Digital Forensics & Information Security, while continuously developing my skills in networking, web security, vulnerability assessment, and cybersecurity research. My goal is to build a career where I can combine my technical knowledge, curiosity, and problem-solving skills to identify security risks and contribute to securing systems and organizations.

CYBERSECURITY EXPERIENCE

RISE Internship Program – Tamizhan Skills | *Cybersecurity Intern* | *June 2025 – July 2025*
Gained hands-on experience in cybersecurity through practical, project-based learning.
Developed Python-based projects including a Phishing URL Detector, Password Strength Checker, Keylogger, and Port Scanner.
Applied concepts of ethical hacking, network scanning, Python programming, and information security while building and testing these projects.

TECHNICAL SKILLS

- **Programming:** Python
- **Operating Systems:** Kali Linux, Ubuntu, Windows
- **Penetration Testing:** Nmap, Metasploit, Burp Suite
- **Networking:** TCP/IP, Network Scanning, Routing, Switching, VLANs
- **Network Simulation:** Cisco Packet Tracer
- **Network Analysis:** Wireshark
- **Digital Forensics:** FTK Imager, Autopsy, Disk Drill, MiniTool Partition Wizard

PROJECTS & SECURITY LABS

- **Multi-layer Spyware Detection System** | *Kotlin* | *Android* | *Room Database* | *Retrofit* | *On going*
  Developing a multi-layer Android security system for detecting potential spyware and suspicious application behavior. Analyzing application permissions, manifest information, download sources, and behavioral indicators. Implementing heuristic-based detection, risk scoring, background monitoring, and security alerts.
- **Phishing URL Detection Tool** | *Python* | *Pandas* | *Scikit-learn* | *Random Forest* | *Tkinter* GitHub
  Developed a machine-learning-based application for detecting potentially malicious URLs.
  Extracted URL characteristics and applied a Random Forest classifier for phishing detection.
  Built a Tkinter-based graphical interface for URL analysis and classification.
- **Remote Device Security Server** | *Python* | *Flask* | *REST API*
  Developed a Flask-based security server for remote device monitoring.
  Implemented image upload, location reporting, command handling, and activity logging functionality.
- **Multithreaded Port Scanner** | *Python* | *Socket Programming* | *Multithreading* GitHub
  Developed a TCP port scanner for authorized network reconnaissance.
  Implemented socket-based connections and multithreading to identify open ports.
- **Password Strength Checker** | *Python* GitHub
  Developed a password security assessment tool to evaluate password strength.
  Implemented password validation logic to provide security-focused feedback.

- **Keylogger Implementation** / *Python* GitHub
  Developed a controlled keylogging project to understand keystroke-capture mechanisms.
  Studied endpoint security risks and techniques relevant to detecting malicious keylogging behavior.

Research Work:

BitChat – Decentralized Communication Security Research | *Ongoing*

- Researching the architecture and security model of decentralized, peer-to-peer communication systems.
- Studying Bluetooth-based device discovery, mesh communication, the Noise Protocol Framework, privacy mechanisms, and communication security.
- Analyzing potential security limitations and attack surfaces in decentralized communication environments.

Extra-curricular:

- **Deloitte Australia – Cyber Job Simulation | Forage** / *March 2026*
  Analyzed web activity logs to investigate potentially suspicious user activity.
  Worked on a simulated cybersecurity breach investigation.
  Identified suspicious activity based on available security data.
- **Tata Consultancy Services – Cybersecurity Analyst Job Simulation | Forage** / *August 2026*
  Worked on a simulated Identity and Access Management (IAM) consulting scenario.
  Applied IAM principles and cybersecurity best practices to business requirements.
  Prepared technical documentation and presentations to communicate security recommendations.
- **CyLab Security Academy (picoCTF) – Cybersecurity CTF Platform**
  In Progress
  Practicing hands-on cybersecurity challenges through CTF-based exercises.
  Developing practical problem-solving and security analysis skills across different challenge categories.
- **PortSwigger Web Security Academy**
  In Progress
  Practicing hands-on web application security labs in a controlled learning environment.
  Developing practical skills in identifying and understanding common web vulnerabilities using Burp Suite.

CERTIFICATIONS

Google Cybersecurity Professional Certificate – Coursera | Credential
Google AI Essentials Certificate – Coursera | Credential

EDUCATION

- **National Forensic Sciences University (NFSU), Bhubaneswar**
  M.Sc. Digital Forensics & Information Security | Final Year | 2025 – Present
- **Don Bosco College, Panjim, Goa**
  Bachelor of Computer Applications (BCA) | CGPA: 8.24
- **PM SHRI Kendriya Vidalaya NO.2 Vasco-Da-Gama, Goa:**
  Higher Secondary School Certificate (12th Class (commerce)) – 62.16%
