MOBIN MATHEW

Network Engineer | Linux | Digital Forensics

+91-7249031971 | mobinmathew411@gmail.com | LinkedIn | GitHub | CyLab (CTF) | Portfolio

PROFESSIONAL SUMMARY

M.Sc. Digital Forensics & Information Security postgraduate with a strong interest in Network Engineering, Linux, Cybersecurity, and IT Infrastructure. Possess practical knowledge of TCP/IP networking, routing, switching, VLANs, network scanning, and traffic analysis through hands-on laboratory exercises and technical projects. Comfortable working with Linux environments, including Kali Linux and Ubuntu, and experienced with Python scripting, Nmap, Wireshark, and Cisco Packet Tracer. Also have practical exposure to digital forensics and cybersecurity projects. Interested in gaining hands-on experience in server environments, network monitoring, infrastructure management, and technical troubleshooting. Eager to learn new technologies, work with experienced professionals, and contribute to real-world technical project

EXPERIENCE

- **RISE Internship Program – Tamizhan Skills** | *Cybersecurity Intern* | *June 2025 – July 2025*
  Gained hands-on experience in cybersecurity through practical, project-based learning.
  Developed Python-based projects including a Phishing URL Detector, Password Strength Checker, Keylogger, and Port Scanner.
  Applied concepts of ethical hacking, network scanning, Python programming, and information security while building and testing these projects.
- **DIGITAL FORENSICS & CYBERSECURITY LAB EXPERIENCE** | *National Forensic Sciences University (NFSU), Bhubaneswar | Approximately 1 Year*
  - **Mobile Forensics:** Mobile device examination, data extraction procedures, Android device investigation
  - **Computer Forensics:** Digital evidence examination, forensic artifact analysis, file system investigation
  - Digital Evidence Management: Evidence acquisition, preservation, integrity verification, forensic documentation
  - **Network Security:** Network reconnaissance, port scanning, network traffic analysis

TECHNICAL SKILLS

- **Networking:** TCP/IP, IP Addressing, Routing, Switching, VLANs, Network Scanning
- **Operating Systems:** Kali Linux, Ubuntu, Windows
- **Network Monitoring & Analysis**: Wireshark, Nmap
- **Network Simulation**: Cisco Packet Tracer
- **Programming & Scripting:** Python
- **Cybersecurity Tools:** Burp Suite, Metasploit
- **Digital Forensics:** FTK Imager, Autopsy, Cellebrite UFED, ADB, Disk Drill, MiniTool Partition Wizard

PROJECTS & SECURITY LABS

- **Multi-layer Spyware Detection System** | *Kotlin | Android | Room Database | Retrofit | On going*
  Developing a multi-layer Android security system for detecting potential spyware and suspicious application behavior. Analyzing application permissions, manifest information, download sources, and behavioral indicators. Implementing heuristic-based detection, risk scoring, background monitoring, and security alerts.
- **Phishing URL Detection Tool** | *Python | Pandas | Scikit-learn | Random Forest | Tkinter* GitHub
  Developed a machine-learning-based application for detecting potentially malicious URLs.
  Extracted URL characteristics and applied a Random Forest classifier for phishing detection.
  Built a Tkinter-based graphical interface for URL analysis and classification.
- **Remote Device Security Server** | *Python | Flask | REST API*
  Developed a Flask-based security server for remote device monitoring.
  Implemented image upload, location reporting, command handling, and activity logging functionality.
- **Multithreaded Port Scanner** | *Python | Socket Programming | Multithreading* GitHub
  Developed a TCP port scanner for authorized network reconnaissance.
  Implemented socket-based connections and multithreading to identify open ports.
- **Password Strength Checker** | *Python* GitHub
  Developed a password security assessment tool to evaluate password strength.
  Implemented password validation logic to provide security-focused feedback.
- **Keylogger Implementation** | *Python* GitHub

Developed a controlled keylogging project to understand keystroke-capture mechanisms.
Studied endpoint security risks and techniques relevant to detecting malicious keylogging behavior.

ACHIEVEMENTS:

- **Deloitte Australia – Cyber Job Simulation | Forage** | *March 2026*
  Analyzed web activity logs to investigate potentially suspicious user activity.
  Worked on a simulated cybersecurity breach investigation.
  Identified suspicious activity based on available security data.
- **NFSU Bhubaneswar – Cyber Awareness Week Capture the Flag (CTF) Competition / 27 OCTOBER 2026**
  Secured 6th place in the **Capture the Flag (CTF) competition** conducted by NFSU Bhubaneswar as part of Cyber Awareness Week.
  Independently solved cybersecurity challenges using hands-on investigation, technical analysis, and problem-solving skills.
  Completed the challenges **without using AI tools, demonstrating independent technical reasoning and practical cybersecurity knowledge.**
- **Tata Consultancy Services – Cybersecurity Analyst Job Simulation | Forage** | *August 2026*
  Worked on a simulated Identity and Access Management (IAM) consulting scenario.
  Applied IAM principles and cybersecurity best practices to business requirements.
  Prepared technical documentation and presentations to communicate security recommendations.
- **CyLab Security Academy (picoCTF) – Cybersecurity CTF Platform**
  In Progress
  Practicing hands-on cybersecurity challenges through CTF-based exercises.
  Developing practical problem-solving and security analysis skills across different challenge categories.
- **PortSwigger Web Security Academy**
  In Progress
  Practicing hands-on web application security labs in a controlled learning environment.
  Developing practical skills in identifying and understanding common web vulnerabilities using Burp Suite.
- **NullOrigin CTF 2026 | Cybersecurity CTF Participant — CyberHx | Credential ID: NO-2026-3A68F7** NullOrigin
  Participated in a Capture the Flag (CTF) cybersecurity competition to practice problem-solving and security investigation skills.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate – Coursera | Credential
- Google AI Essentials Certificate – Coursera | Credential
- **Certified WiFi Pentesting 101 (Deauth, Spam, and Captive Portal)** – CappricioSec University | October 2026 | Credential

EDUCATION

- **National Forensic Sciences University (NFSU), Bhubaneswar**
  M.Sc. Digital Forensics & Information Security | Final Year | 2025 – Present
- **Don Bosco College, Panjim, Goa**
  Bachelor of Computer Applications (BCA) | CGPA: 8.24
